

Greener power solutions Chile

What is Enel Green Power?

This is the first industrial-scale plant of its kind in Chile and one of the largest in Latin America. It is also the first project to produce green hydrogen for Enel Green Power; that begins construction at a global level. AME and Enel are partners in this project, co-developing renewable generation (wind) and green hydrogen production.

How can Enel Green Power help you?

Read all the stories of our commitment to the country. How can we help you? In Chile, Enel Green Power has built South America's first geothermal power plant. All our technologies are fully supporting the country's energy transition.

Does EGP Chile produce green hydrogen?

EGP Chile has been involved in the development of green hydrogen for years. Cerro Pabellón, a joint venture between Enel Green Power and ENAP is the first geothermal plant in the country and green hydrogen has already been produced there since 2017.

What does Enel Chile do?

Enel Chile generates, transmits and distributes energy through its subsidiaries. It is the largest electricity company in the country by installed capacity with more than 7,200 MW of which 4,700 MW are from renewable energies.

Where is Chile's first green hydrogen plant located?

Punta Arenas September 10, 2021 - The groundbreaking for Chile's first industrial-scale pilot plant for green hydrogen production located in Cabo Negro, north of Punta Arenas, took place today.

Who attended the energy & mining ceremony in Chile?

The ceremony was attended by the Minister of Energy and Mining, Juan Carlos Jobet, along with representatives of Enel Green Power Chile, AME, Siemens Energy, Porsche, Enap and Exxon Mobile, and local authorities.

Antofagasta, August 18, 2022 - Enel Chile, through its renewable energies subsidiary, Enel Green Power Chile, received authorization from the National Electric Coordinator to begin ...

Enel Chile está presente en el sector de las energías renovables en el país a través de Enel Green Power, compañía que opera una cartera tecnológica que incluye energía hidroeléctrica, ...

Enel Green Power Chile, a subsidiary of Enel Chile, is developing studies to install a hydrogen production

plant in Chile's southern region of Magallanes. ... Specifically, a ...

Antofagasta, August 18, 2022 - Enel Chile, through its renewable energies subsidiary, Enel Green Power Chile, received authorization from the National Electric Coordinator to begin commercial operations at the Azabache Plant, ...

Rome, August 26 th, 2019 - Enel, through its renewable subsidiary Enel Green Power Chile, began the construction of its new solar photovoltaic (PV) plant, Campos del Sol. With ...

Mobile battery storage rental company Greener Power Solutions has raised EUR45 million (US\$45 million) from DIF Capital Partners. Greener Power, founded in 2018, provides mobile battery energy storage solutions through a ...

This first industrial-scale pilot project to produce green hydrogen is powered by green energy generated by a 3.4 MW wind turbine and uses a 1.25 MW electrolyzer that will produce green hydrogen from water.

Enel Chile está presente en el sector de las energías renovables en el país a través de Enel Green Power, compañía que opera una cartera tecnológica que incluye energía hidroeléctrica, eólica, fotovoltaica y geotérmica.

Enel Green Power Chile, the renewables division of Chilean utility company Enel Chile, has started assembling an 80-MW solar farm with a collocated battery energy storage system (BESS) of 67 MW near the nation's ...
