

What is the country strategy for Guinea-Bissau?

Energy a key component of Country Strategy for Guinea-Bissau Guinea-Bissau's energy and transport infrastructure are at the core of the recently published Country Strategy Paper 2022-2026. News & Commentary

What types of industrial systems does Schmid AG offer?

Industrial Systems include wood-fired boilers with an output of 180 to 8000 kW. A large number of biogenic solid fuels can be used as energy sources. Schmid AG has a 24h customer service (365 days) and thus ensures that the clientele is looked after around the clock.

What is a Schmid combustion system?

Schmid combustion systems enable environmentally friendly heating and are in use around the globe. For more than 85 years we have been dealing with wood firing systems in the industrial, commercial and residential sectors. Energy generation from wood has many advantages and requires a great deal of experience, knowledge and competence.

Is Schmid still a company?

The headquarters of the Schmid Group are still located here today. The slogan "wood energy stored" became a hit. Schmid was the first company in the world to sell log firing systems with storage. Smiled at by competitors, hotly sought after by customers. Today, the use of an accumulator is required by law.

Who makes biomass heating systems & heat pumps?

We are a leading Swiss manufacturer and supplier of biomass heating systems and heat pumps. Our versatile portfolio ranges from wood heaters and heat pumps for single-family homes to 8 MW wood-burning systems for district heating and industrial applications.
