

With the rapid development of portable electronic devices and electrical vehicles, the production of lithium-ion batteries has reached an unprecedented scale. All major lithium battery manufacturers are constantly expanding their production capacity to meet the big market.

HiNa focuses on low-cost, long-life, high-safety and high-energy density Na-ion battery products. The potential applications cover low-speed electric vehicles, large-scale energy storage, electric vehicles, and national security. The company also supplies cathode and anode materials and electrolytes for sodium ion batteries.

HiNa Battery Technology (????????????) is a manufacturer of energy storage systems. It offers sodium-ion batteries for electric bicycles, vehicles, communication base stations, data centers, and home energy storage.

Discover Hina Battery, the world's only company specializing in the mass production of sodium ion batteries. As a leader in advanced energy solutions, we offer cutting-edge sodium ion batteries for grid-scale energy storage and power applications. Explore our innovative technology and join us in shaping the future of energy storage.
