Yes, the smart storage bin is rather awful. Which is rather sad, it would be neat to have them just work, but I always use weight plates instead, which is more error prone and likelier to break. No idea why the smart storage bin uses power while gas and liquid storage get automation for free.

The only way I found around it is to use the Smart as a 2nd overflow bin to a regular Storage Bin. I got the design from either Brothgar or FJ. You need to limit access to only one direction. Then put the Reg Bin first so they only pull ...
