

Does ferroamp take responsibility if the ESS power case is not installed?

Ferroamp does not take responsibility for installations where the following stated criteria are not met. NOTE! Make sure that the ESS Power Case and the ESS Battery are positioned close enough for the premade battery cables to reach. Indoor environment protected from rain and direct sunlight.

Why should you choose a ferroamp energy storage system?

With the Ferroamp system's open flexibility, you can support the electricity grid while controlling power consumption and storing solar power in the property. Ferroamp's energy storage solutions are scalable and can be tailored to your power and storage needs. Just as suitable for small houses as they are for larger properties.

Why should you choose ferroamp?

Ferroamp's energy storage solutions are scalable and can be tailored to your power and storage needs. Just as suitable for small houses as they are for larger properties. As the needs and opportunities of the electricity grid and properties change, the functions of the Ferroamp system are updated so that you can constantly optimise electricity use.

Is ferroamp liable for damage caused by incorrect installation?

Ferroamp does not take responsibility for damages on the product caused by incorrect or careless installation. NOTE! We recommend that you use end terminals for all connection points that have multi-threaded conductors. Do not work alone. In an emergency, someone else's presence may be necessary!

How do I calculate a ferroamp cable size?

To calculate correct cable dimensions you can use Ferroamp's online cable calculator, available under the support section. Feed through ~40 cm of cable for and peel off ~35 cm of isolation. Make sure that all terminals are tightened to 2.5 Nm, use a torque wrench. SSO. NOTE!

*NOTE: The information below is directed towards installers. Only trained electricians are allowed to install Ferroamp's products. Answer: To connect more than 3 SSOs to an EnergyHub ...
