

How has Iraq's energy system changed over the years?

This has introduced a number of vulnerabilities to Iraq's energy system. For example, payment issues last summer led to Iran cutting exports, significantly exacerbating electricity shortages in Iraq during peak seasonal demand. As oil production has soared, so has the amount of associated gas produced alongside.

Why is Iraq's energy system vulnerable?

However the capacity to capture and process this gas has not kept pace. The inability to utilise its gas riches means that the country's gas deficit has grown, and Iraq now relies on imports from Iran to meet increasing demand. This has introduced a number of vulnerabilities to Iraq's energy system.

How has war affected Iraq's power infrastructure?

Despite the extraordinary challenges of war in recent years, Iraq has made impressive gains, nearly doubling the country's oil production over the past decade. But the turmoil has also undermined the country's ability to maintain and invest in its power infrastructure.

Will Iraq's oil production increase if water availability increases?

One impending barrier is the availability of water, as planned oil production will require a level of water production above what has been achieved so far. Assuming an increase in water availability, Iraq's production to 2030 grows by around 1.3 mb/d, making it the third largest contributor to global oil supply in that time.

Why does Iraq have a gas deficit?

As oil production has soared, so has the amount of associated gas produced alongside. However the capacity to capture and process this gas has not kept pace. The inability to utilise its gas riches means that the country's gas deficit has grown, and Iraq now relies on imports from Iran to meet increasing demand.

How much oil does Iraq produce a day?

It also takes a detailed look at the country's oil and gas sector, projecting that Iraq's oil production will grow by 1.3 million barrels a day by 2030, becoming the world's fourth-largest oil producer behind the United States, Saudi Arabia and Russia.

The solar subsidy conundrum in France | Energy Global. As reaffirmed at the National Solar Photovoltaic Conference on 19 January 2021, the sector remains strong with a target of increasing its share of renewable energy in France's gross consumption to 32% by 2030.
