

The decarbonisation of Ireland's energy supply necessitates the delivery of increased renewable electricity generation at pace - a recognisable challenge for the electricity grid. The installation of almost 5GW of onshore renewable electricity generation to date, coupled with the ability to accommodate 75 per cent SNSP is a laudable feat ...

Economic growth depends on reliable energy, and there is no bigger growth market than in sub-Saharan Africa. When power comes to a community for the first time, new businesses are formed, children can go to school for longer periods and study at night, and existing business owners buy new electrical appliances to take advantage of their new energy access.

Ireland's national energy-related emissions in 2023 were at their lowest level in over 30 years. Energy-related emissions in 2023 were 31.4 MtCO<sub>2</sub> eq, down 8.3% on 2022 levels, and lower even than those observed during the height of ...

The future grid and renewable energy. The decarbonisation of Ireland's energy supply necessitates the delivery of increased renewable electricity generation at pace - a recognisable challenge for the electricity grid.
