

# Island solar supply Australia

Why should you choose island solar?

Store your free energy from the sun to be used at anytime. No home is alike - and the solar system powering your home should be unique too. Island Solar's proven solar design and installation process analyses your power requirements and creates a custom system ideal for your home, then we install it fuss-free.

Why should you buy a solar system in Australia?

According to the AEMO Australia's energy market operator, the cost of electricity will continue to increase every year between 25% - 40%! Purchasing a quality designed solar system puts the energy back in your own hands. Say goodbye to high electricity bills.

We acknowledge the Traditional Owners of country throughout Australia and recognise their continuing connection to land, waters and culture. We pay our respects to their Elders past, present and emerging. VIC REC 19496 QLD LIC 84107 &#169; 2024 Island Energy All rights reserved.

What is the island solar group?

The Island Solar Group guarantees that 100% of your PV Panels will be recycled and the materials that are extracted will be re-used. No materials will end up in landfill and all processing that takes place happens in Australia.

How long does solar power last in Australia?

The average payback period of solar in Australia is 4 years. Island Energy aims for 2 to 3 years return on your investment (ROI) depending on the system size, daily consumption behaviours and average sunlight hours in your postcode. Solar power is in great demand and around one in four homes in Australia already have it.

Does Australia offer a solar energy rebate?

The Australian Government offers financial incentives through the Small-scale Renewable Energy Scheme, where you are issued with tradable certificates for eligible solar PV systems. Some states also offer their own rebates such as the Solar Victoria programs. Solar electricity is one way to power your home or business that benefits the environment.
