

Isle of Man solar power to run a house

Where does the Isle of Man get its electricity?

Most of the Isle of Man's electricity is generated at a gas-fired power station in Douglas. Manx Utilities (MU) has announced that electricity prices on the island are to rise by 30%. The increase will be applied in two increments of 15%, one in April and then one in July.

Is it time to install solar panels in the Manx?

Even on a bright Manx winters day a panel can generate a considerable amount of electricity (perhaps 30% of capacity). There is something very satisfying about receiving an energy bill from Manx Utilities which is not only zero, they might pay you because of excess energy sold to the grid. There has never been a better time to install solar.

Who are Manx solar electrical?

Manx Solar Electrical are the Isle of Man's exclusive Stiebel Eltron service partners. We are also a Mitsubishi ASHP service partner and Dimplex approved and accredited installers. Our engineers install high performance JA Solar /REC and Sun Power solar modules together with SolarEdge optimisers and inverters.

Why should you go green on the Isle of Man?

go green promote clean energy technologies on The Isle of Man. Reduce your environmental impact, one carbon-footprint at a time. Air Source Heat Pumps (ASHP). At a price which does not cost the earth, go green today.

A small solar array of 8 panels can produce 3630kwhrs of electricity and this equates to an annual cost saving of £163;1034.55. On a larger scale, Manx Solar Electrical installed 228 Solar panels to Manx Telecom HQ in 2023. In their first year, the 228 solar panels have generated over 70 MWh of electricity, saved more than 27.5 tonnes of CO2 ...
