What happened at a hydroelectric power plant in northern Italy?

Three people have died and four are missing following an explosion at a hydroelectric power plant in northern Italy. The blast occurred underwater at the plant on Lake Suviana, 70km (43 miles) from the city of Bologna on Tuesday.

How will Italy's energy reforms affect the grid?

Italy is implementing European Union permitting reforms that could speed up projects but surging demand will pile further pressure on grid authorities already inundated with requests. Solar and wind installations hiked 120% in the first half of 2023 to 2.5 GW, data from national grid operator Terna showed.

Where does Italy's solar power come from?

Italy's solar development to date has been concentrated on the islands of Sicily and Sardinia and in the southern regions of Puglia and Lazio, mainly due to strong solar resources and land availability. Higher power prices in Sicily have boosted the business case there.

How many solar projects are under development in Italy?

There is currently over 130 GW of solar projects under development, Matteo Coriglioni, Market Lead, Italy at Aurora Research, told Reuters Events. "Compared to the last decade of anaemic growth in deployment, we should expect a decisive acceleration in the coming years," he said. Permit progress

What happened at the Bologna hydroelectric plant?

The company expressed its deepest condolences and closeness to all the victims and their families and said that while there was no indication that the dam had suffered any damage, the power plant had stopped production. Three people are dead and several missing after a fire at a hydroelectric plant near Bologna.

Will Italy's permitting actions help with environmental and construction permits?

In general, Italy's permitting actions should help with environmental and construction permits, Zoisa North-Bond, CEO of Octopus Energy, said. However, like in many parts of Europe, "the time it takes to connect projects to the grid remains a hurdle everywhere," she said. Grid delays

Winds speeds of more than 100 km/h in Brazil on Friday Oct. 11, 2024, left more than 2.6 million electricity users without power in the state of S o Paulo, 2.1 million of them customers of Enel ...

The low-pressure system, named Minerva by the Italian Meteo Aeronautica Militare, has brought heavy rain and intense winds to Italy and surrounding countries this week, causing widespread damage...

The grid-scale Italian energy storage market has been kickstarted from two different directions. The first was big wins for battery storage projects in ancillary service and capacity market auctions by Terna, in 2020 and

2022, respectively. The second is a policy recognition from Terna that energy storage will be

The results of Italy's main grid capacity market auction for 2025, published by Terna, show energy storage represented 51.1% of the 174 MW of new capacity assigned.. Thermoelectric plants made up the balance, with the new capacity secured for EUR67,500 (\$72,900) per megawatt per year, for a total cost of EUR11.75 million.
