5 ???· On average, a 5 kW solar panel system costs \$13,750, according to real-world quotes on the EnergySage Marketplace from the first half of 2024. However, your price may differ; solar costs can vary significantly from state to state. The table below should give you an idea of what you can expect to pay for a 5 kW solar panel system in your state.

Solar financing interest rates, and repayment terms are subject to the financial institution used. Prices listed are not fixed and may vary based on your tailored, final package. We accept special order requests for additional sizes not mentioned.

Off-Grid System The Off-Grid System uses batteries to store the electricity created when the energy from the sun is converted in the Solar Panel System. The batteries enable the energy from the system to be used at nights and or periods of no or very low sunlight.

Sedai-Jam believes all solar system are unique. With that in mind our Team design the system based on how much power you need, types of components and equipment"s that suits that installation and the amount of space available to install solar panels.
