

What do people in Jersey think about solar farms?

Jersey Electricity (JE) is asking people in St Mary what they think about proposals for two solar farms. The solar farms would produce enough energy to power nearly 1,200 homes in Jersey, said JE. Land earmarked for the siting of the panels would continue to be used for grazing and growing crops, it said.

Are there plans to build a solar farm in Jersey?

Concerns have been raised over plans to build six solar farms across Jersey. The first site is nearing completion at St Clement and two other sites have passed the planning stage, with building work expected to begin in early 2025.

Will the price of solar energy come down in Jersey?

The JE boss says that if similar developments are built in other parts of the island, then the price of electricity produced by solar panels is more likely to come down. JE currently has two other sites in Jersey earmarked for ground-mounted solar energy production and is also working on installing more roof-based solar panels across the island.

Does Jersey have solar panels?

JE currently has two other sites in Jersey earmarked for ground-mounted solar energy production and is also working on installing more roof-based solar panels across the island. Earlier this week, JE increased islanders' electricity tariff by 7.5% from January 2025, adding around £2 extra per week to the average household bill.

How much does a solar farm cost in the Channel Islands?

The first solar farm in the Channel Islands will be finished by the end of the year, Jersey Electricity (JE) has said. The power provider has leased an 11-acre site on St Clement fields where it is setting up nearly 7,500 solar panels. JE said the solar farm had cost about £5m to build and would provide electricity to 600 or 700 homes.

Will a ground-mount solar panel installation reduce energy prices in Jersey?

Jersey predominantly relies on energy imported from neighbouring France. Credit: ITV Channel Jersey Electricity's (JE) CEO says a ground-mount solar panel installation on the island will help reduce energy prices in the long term.

Powering 5000 homes is the equivalent of generating 36MWp of electricity from various solar voltaic sources - enough to power around 10% of housing in Jersey. Solar currently accounts for less than 0.5% of Jersey's current energy ...

Powering 5000 homes is the equivalent of generating 36MWp of electricity from various solar voltaic sources - enough to power around 10% of housing in Jersey. Solar currently accounts for less than 0.5% of Jersey's current energy generation. Achieving the Solar 5000 ambition would increase it to 6.5% of the energy share, all generated locally.

The two largest solar PV arrays in the Channel Islands are now "live", providing Jersey annually with 750,000 units of on-Island-generated renewable electricity for at least the next 25 years. The 2,500 square-metre array on the roof of Jersey Dairy and a 1,311 square-metre array on a warehouse roof at Woodside Farm, Trinity, have been ...

The two largest solar PV arrays in the Channel Islands are now "live", providing Jersey annually with 750,000 units of on-Island-generated renewable electricity for at least the next 25 years. ...

In a corner of St Clement near the Grouville border, hidden away down a narrow lane, a fascinating renewable energy project is taking shape: Jersey's first large-scale, ground-mounted solar array. On completion - hopefully by the end of the year - the Jersey Electricity array will produce over 4MW of electricity a year, enough to...
