

Will Kosovo offer a 100 MW solar PV project?

Kosovo is holding a competitive auction for a 100 MW solar PV project. This is a tremendous opportunity for the country to partner with international and local investors to expand renewable energy generation. As a first step, we encourage developers and investors to review the Contract Notice and Prospectus, available via the links below.

What is the New Kosovo power plant?

The New Kosovo power plant is part of the government's plans to reform Kosovo's energy sector. Other plans include closing Kosovo A power station by 2017, rehabilitating Kosovo B power station to meet EU standards, and privatizing the country's electricity distribution system. Plans for New Kosovo also include a lignite coal mine, the Sibovc SW.

Does Kosovo have solar power?

Kosovo has the potential of capturing solar energy directly and converting it to electricity. The region of highest solar potential based on global horizontal irradiation is the southeastern part of Kosovo, centred around the city of Gjakova. Solar power is already used on the roofs of some buildings.

What is the Kosovo solar auction?

Conducted through an open and transparent process, the Kosovo solar auction will offer investors a number of critical advantages, including guaranteed price assurance, streamlined administrative procedures with government agencies, and no land acquisition costs. The Auction process is underway:

How will e-auction work in Kosovo?

The Kosovo Public Procurement Regulatory Commission demonstrated how the e-auction will work and how it will ensure transparency and fairness. Representatives from EBRD, IFC, and the EU discussed their work in Kosovo, emphasized the potential positive impact of the auction, and expressed their readiness to support potential investors.

The solar power plant will help save more than 130,000 tonnes of carbon dioxide emissions annually. In total, 152 GWh of green electricity will be produced annually, benefiting Kosovo ...

The project concerns the development of a 100MW solar photovoltaic (PV) power plant, located between Obilic and Fushe Kosova, in close proximity to Pristina, in Kosovo. The PV plant will produce electricity from low carbon sources, therefore it addresses the market failure of negative environmental externalities, by reducing carbon and air ...

The solar power plant will help save more than 130,000 tonnes of carbon dioxide emissions annually. In total, 152 GWh of green electricity will be produced annually, benefiting Kosovo households, public institutions

and companies.

To support the green transition in Kosovo*, one of its largest solar photovoltaic plants will be constructed on former ash dump fields near Pristina with a capacity of up to 100 MW. The electricity sector in Kosovo is almost entirely dependent on coal-fired power plants.

A consortium led by Switzerland-based construction company Orllati was selected to build and operate a solar park of up to 105 MW in connection capacity for 30 years including a 15-year contract for difference. ...

To support the green transition in Kosovo*, the European Investment Bank (EIB) has signed a EUR33 million investment loan for the construction one of its largest solar photovoltaic plants near Pristina - with a ...

In 2024, Kosovo completed its first ever solar auction with winning bidder, the Orllati consortium, for a 100 MW solar park in Kramovik. This groundbreaking solar auction ensured a transparent and level playing field for qualifying bidders and is a testimony to growing investor interest in Kosovo's vast renewable energy potential.

The European Investment Bank (EIB) said on Monday that it has signed a EUR-33-million (USD 35.9m) investment loan for the construction of a solar farm with a targeted capacity of 100 MW/120 MWp in Kosovo.

A consortium led by Switzerland-based construction company Orllati was selected to build and operate a solar park of up to 105 MW in connection capacity for 30 years including a 15-year contract for difference. The group won the first renewable electricity auction in Kosovo* with a bid of EUR 48.88 per MWh.

Kosovo is taking a significant step towards a sustainable future with the upcoming construction of one of its largest solar power plants. The European Investment Bank (EIB) is leading the charge with a EUR33 million investment, a part of a comprehensive financial plan to support the project.

The Bank intends to contribute to the transition to a low-carbon economy by supporting the development of a 100 MW solar power plant in the Obiliq area, as well as strengthening connectivity by supporting sustainable transport infrastructure.

To support the green transition in Kosovo*, the European Investment Bank (EIB) has signed a EUR33 million investment loan for the construction one of its largest solar photovoltaic plants near Pristina - with a capacity of up to 100 MWac (120MWp).

To support the green transition in Kosovo*, the European Investment Bank (EIB) has signed a EUR33 million investment loan for the construction one of its largest solar ...

This investment project will install a solar photovoltaic plant of up to 100 MW capacity on former ash dump fields near Kosovo A thermal power plant. This will be the first large-scale solar photovoltaic plant in Kosovo

Kosovo evergreen power solar

and will increase installed capacities tenfold from 10.1 MW to ...

The Bank intends to contribute to the transition to a low-carbon economy by supporting the development of a 100 MW solar power plant in the Obiliq area, as well as strengthening connectivity by supporting sustainable
