Who is Langa international?

With its extensive experience in France and abroad, LANGA INTERNATIONAL has mastered the entire value chain involved in developing wind energy projects. Our strategy is based on a model of openness to different opportunities, either through our own deployment of large-scale projects or through the acquisition of assets under development.

What agrivoltaics solutions is Langa international working on?

LANGA International is also working on dynamic agrivoltaics solutions: a solution based on the synergy between electricity production and the maintenance of agricultural production according to the vagaries of the weather.

Why should you choose Langa international?

One of Langa International's major assets is its ability to develop innovative solutions to meet the various constraints faced by its customers. With its extensive experience in France and abroad, LANGA INTERNATIONAL has mastered the entire value chain involved in developing wind energy projects.

Where can Langa solar work?

Ground-mounted solar: LANGA International works on generally degraded land: wasteland, desert areas, former quarries, former landfill sites or low-yield agricultural land. These projects can be optimised by installing tracker systems to follow the sun's cycle and maximise electricity production.

What's new at Langa international?

Our latest news. LANGA INTERNATIONAL welcomes SWEN Capital Partners and benefits from the renewed support of existing shareholders including Bpifrance via its France Investissement Energie Environnement fund and RGREEN INVEST to accelerate its development in France and abroad through a 85 million euro capital increase.

How many MWp does Langa International have?

Today LANGA International operates more than 40 MWp, spread over several territories. All these plants are managed by LANGA International's local teams. Our strategy is based on a dynamic of concerted deployment with local players, to participate in the development of more responsible local energy independence.
