Are California's battery energy storage systems going up?

For Immediate Release: October 24, 2023 SACRAMENTO -- New data show California is surging forward with the buildout of battery energy storage systems with more than 6,600 megawatts (MW) online, enough electricity to power 6.6 million homes for up to four hours.

Where is California's largest battery storage facility?

[1/5] A drone view shows California's largest battery storage facility, as it nears completion on a 43-acre site in Menifee, California, U.S., March 28, 2024. REUTERS/Mike Blake Purchase Licensing Rights

How much battery storage does California need?

The state is expected to need about 50 gigawatts of battery storage to meet its 2045 goal of getting all of its power from carbon-free sources, up from about 7 GW today. [1/5] A drone view shows California's largest battery storage facility, as it nears completion on a 43-acre site in Menifee, California, U.S., March 28, 2024.

How much battery storage will California have in 2024?

From 2018 to 2024, battery storage capacity in California increased from 500 megawatts (MW) to more than 13,300 MW, with an additional 3,000 MW planned to come online by the end of 2024. The state projects 52,000 MW of battery storage will be needed by 2045.

How big is California's battery bank?

The 680-megawatt lithium-ion battery bank is big even for California, which boasts about 55% of the nation's power storage capacity, according to data from the U.S. Energy Information Administration. Calpine will bring online 620 MW of the bank in two phases this year starting in the summer and open the remaining 60 MW in 2025.

Will a new battery plant help California meet climate goals?

April 12 (Reuters) - A major battery plant near Los Angeles will be among the largest in the world when it comes online later this year, promising to shore up California's power grid during the peak summer season and help the state meet ambitious climate goals.

Germany-based Rolls-Royce has been awarded a contract to supply two large-scale battery energy storage systems to Augstsprieguma tīkls (AST), Latvia's transmission system operator, with a ...

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in Targale, Ventspils region. This autumn, ...
