What makes Microvast a great battery company?

Forward Thinking. Microvast produces innovative and reliable lithium-ion batteries with advanced technologies. With nearly two decades of experience in battery development, we're accelerating the adoption of clean energy with the installation of more than 31,000 battery systems in 34 countries.

What can Microvast do for You?

Since placing its first battery systems into operation in electric buses more than a decade ago, Microvast has expanded its business to serve a broad range of commercial, passenger and specialty vehicles, including mining, material handling, and power vehicles and equipment, as well as grid-scale energy storage applications.

Where are Microvast batteries made?

Microvast was founded by Yang Wu in 2006 in Houston, Texas, along with its Chinese subsidiary, Microvast Power Systems (Chinese: 微瓦斯特) in Huzhou, China. It introduced its first generation of batteries in 2009, with manufacturing starting in 2010 in Huzhou factory. [citation needed]

What makes Microvast unique?

Microvast is renowned for its cutting-edge cell technology and its vertical integration capabilities which extend from core battery chemistry (cathode, anode, electrolyte, and separator) to modules and packs.

What makes Microvast a great place to work?

To facilitate this, we strive to provide our employees with a safe, growth-oriented work environment that encourages innovation. Our dedication to fostering this atmosphere is part of what makes Microvast a leader in battery technology and a remarkable place to work. Microvast is headquartered in Stafford, Texas.

What did Microvast do in 2008?

Commenting on today's significant milestones, Microvast's founder, Chairman, CEO and President, Yang Wu, said, "In 2008, we set out to power a mobility revolution by building disruptive battery technologies that would allow electric vehicles to compete with internal combustion engine vehicles."

Microvast Holdings, Inc. is a battery technology company headquartered in Stafford, Texas, and publicly traded on the NASDAQ Stock Exchange. It designs, develops and manufactures battery components and systems primarily for electric commercial vehicles and utility-scale energy storage systems (ESS). Microvast has manufacturing facilities in the United States, China, and Germany.

Additionally, in connection with the proposed transaction (the "Proposed Transaction") involving Tuscan and Microvast, Inc. a Delaware corporation ("Microvast"), Tuscan intends to file relevant materials with the SEC, including a proxy statement. On February 16, 2021 Tuscan filed a preliminary proxy statement with the SEC
