In 2015, the Government of Madagascar launched its New Energy Policy (NEP 2015-2030) target-ing electrification of at least 70 percent by 2030 through grid and off-grid energy solutions. As a continuation of the NEP 2015-2030, the recently approved Stratégie Nationale d"Electrification aims to achieve 70 percent energy access by targeting

Axian has secured MGA 47.1 billion (\$10.9 million) to finance a 40 MW solar plant and a 5 MWh storage facility in Madagascar. The installation is the island state's largest solar park.

It also includes non-energy uses of energy products, such as fossil fuels used to make chemicals. Some of the energy found in primary sources is lost when converting them to useable final products, especially electricity. As a result, the breakdown of final consumption can look very different from that of the primary energy supply (TES).
