

The Marshall Islands government is injecting \$10 million to the Marshalls Energy Company this fiscal year, with a planned additional \$7 million next fiscal year. The purpose of the funding is to support MEC's need to purchase new engines for the ...

From Refuse to Resource: Investigating and potentially implementing waste-to-energy solutions aligns with MEC's innovative stance, transforming municipal waste into a viable electricity source, thus addressing solid waste management while boosting energy production.

The renewable energy scheme will involve the installation of solar panels, battery storage capacity and grid management options in Majuro, the islands' capital city. According to the statement, the World Bank will also deliver technical assistance to the country in order to identify further options for renewables development in Ebeye and the ...

MEC has been a major economic driving force in Majuro and many of the other islands in the Republic of the Marshall Islands (RMI) in terms of reliable, low cost electricity, technical training and economic engine.

The Government of the Republic of Marshall Islands has been provided with grant funding by the World Bank (WB) for a Sustainable Energy Development Project (SEDeP) aimed at increasing the share of renewable energy from 2% to 9% and to improve power ...
