What does Drax do?

Our businesses are dedicated to enabling a zero carbon, lower cost energy future. Drax is the biggest supplier of renewable electricity to businesses by annual consumption, providing 100% renewable source power, electrification services and smart meters.

Where does Drax electricity come from?

The electricity we supply comes from Drax Power Station, near Selby in North Yorkshire. The plant uses sustainable biomass sourced from established, responsibly-managed working forests. We also have power purchase agreements with around 2,300 independent, UK-based generators. What makes up the Fuel Mix of the electricity we supply?

Who owns Drax Power Station?

In 1990, the electricity industry of England and Wales was privatised under the Electricity Act 1989. Three generating companies and 12 regional electricity companies were created. As a result of privatisation, Drax Power Station came under the ownership of National Power, one of the newly formed generating companies.

Drax is a growing, international business at the heart of the green energy transition and we are accelerating our plans to invest billions of pounds in critical renewable energy and carbon removal technologies which could create ...
