

Will NuScale Power build a small modular reactor in Romania?

NuScale Power of the USA and Romanian national nuclear company Nuclearelectrica plan to construct a NuScale small modular reactor (SMR) plant in Romania by 2028.

Will Romania have a small modular nuclear reactor?

Romania will be the first country outside of the US to have small modular nuclear reactor (SMR) technology. A fraction of the size of regular reactors and designed so that systems can be pre-assembled in a factory, SMRs can produce a large amount of low-carbon energy.

What is a NuScale small modular reactor (SMR) project?

The collaboration between Nuclearelectrica, RoPower Nuclear, Nova Power & Gas (part of the E-INFRA group), Fluor, Samsung C&T Corporation and Sargent & Lundy will facilitate the development and deployment of NuScale small modular reactor (SMR) power plants in Romania, capitalizing on the expertise of these companies in the field of nuclear energy.

Who owns NuScale SMR power plants in Romania?

As well as Nuclearelectrica, RoPower Nuclear, Nova Power & Gas (part of the E-INFRA group and joint owner of RoPower) and Fluor, Samsung C&T Corporation and Sargent & Lundy are also involved in works to facilitate the development and deployment of NuScale SMR power plants in Romania.

What is a small modular reactor?

**DESCRIPTION** Small modular reactors (SMRs) are advanced nuclear reactors that have an installed capacity of up to 300 Mwe/reactor, which means approximately a third of the capacity of a gigawatt reactor. A small modular reactor from NuScale has an installed capacity of 77 Mwe and can be used in plants of 4, 6 or 12 modules, as needed.

Will Romania deploy the first SMR power plant in Europe?

" I salute and support the new steps for deploying in Romania the first SMR power plant in Europe, achieved now by the launch of the project company RoPower Nuclear and the signing of the shareholders declaration by the two companies, Nuclearelectrica & Nova Power & Gas.

Romania's small modular reactor (SMR) project is aiming for 462 MW installed capacity, using NuScale technology with six modules at the former coal plant site at Doicești, each with an installed capacity of 77 MW.

2 ???&#0183; While the SMR market is full of many innovative companies, here are ten small modular reactor companies to look out for as we enter the new year. X-Energy. X-Energy is a ...

A partnership between Romania and the US has brought this advanced nuclear tech to the country as part of a scheme called "Project Phoenix". The reactors will replace old, coal-fired power ...

Funding of up to USD275 million to advance the deployment of a NuScale Power Corporation VOYGR small modular reactor plant in Romania was announced at the G7 leaders' summit by the USA and "multinational ...
