

Montserrat's geothermal production wells at Cork Hill. These wells, located a few kilometres from Plymouth, the former capital before the 1996 volcanic eruptions and now a tourism attraction, highlight the island's significant geothermal potential, an essential resource in Montserrat's future energy strategy.

Energy Snapshot Montserrat This profile provides a snapshot of the energy landscape of Montserrat, a British overseas territory located in the northern half of the Lesser Antilles. Montserrat's utility rates start at \$0.53 per kilowatt-hour (kWh) for residential customers, which is above the Caribbean regional average of \$0.33/kWh. Like many ...

This document presents Montserrat's Energy Report Card (ERC) for 2020. The ERC provides an overview of the energy sector performance in Montserrat. The ERC also includes energy efficiency, technical assistance, workforce, training, and capacity building information, subject to the availability of data.

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided
