

What is Morocco's energy strategy?

When Morocco introduced its national energy strategy in 2009, it initiated an energy transition which aims to ensure that about half of installed electricity generating capacity will come from renewable energy sources by 2030.

How can Morocco improve its energy security?

As a net energy importer seeking to improve its energy security, Morocco has stepped up initiatives to achieve a level of domestic energy sovereignty. This includes following guidelines for transitioning to cleaner energy sources, with an emphasis on diversification.

How is Morocco pursuing a resilient energy future?

Morocco is pursuing a resilient energy future through a multifaceted approach. This includes a strategic focus on renewable energy sources to accompany its energy transition, and the diversification of its energy mix to ensure a sustainable energy transition without compromising energy security.

What are Morocco's energy policy initiatives?

Beyond the advancement of renewable energy, Morocco's policy initiatives encompass energy efficiency measures in challenging-to-abate sectors, such as building insulation and the adoption of energy-saving light bulbs. The overarching objective is to achieve a 20% reduction in overall energy consumption by 2030.

How can Morocco transform its energy sector?

Morocco has embarked on an ambitious journey to transform its energy sector. This ambition is driven by the High Royal Orientations and has three key pillars: increasing renewable energy capacity, promoting energy efficiency, and fostering regional integration.

Is Morocco paving the way for a successful energy transition?

Morocco recognizes cooperation as a crucial element for the success of its strategies, as underlined by the efforts made at COP28. By integrating these factors, Morocco is paving the way for a successful energy transition, without compromising energy security. Morocco's Natural Gas Strategy: A Bridge Fuel to Renewable Energy

DOI: 10.1016/j.matpr.2022.07.094 Corpus ID: 250587132; Results and perspectives of the application of an energy management system based on ISO 50001 in administrative buildings ...
