Looking Inside a BESS: What a BESS Is and How It Works. A BESS is an energy storage system (ESS) that captures energy from different sources, accumulates this energy, and stores it in rechargeable batteries for later use. Should the need arise, the electrochemical energy is discharged from the battery and supplied to homes, electric ...

Time-of-use energy cost management is charging of BTM BESS when the rates are low and discharging it during peak times, with the aim of reducing the utility bill. Continuity of energy supply relates to the ability of the BTM BESS to substitute the network in case of interruption, thus, reducing the damage for the consumer in case of a blackout.
