

Nicosia energy storage field prices

When was the first energy storage system installed in Nicosia?

The first energy storage system, 30 kW/50 kWh, was connected to the electricity system in Nicosia in 2018. Cyprus became the testing ground for an innovative community project delivered by a German electric utility company Autarsys, where 30 kW/50 kWh was connected to a conventional distribution substation in Nicosia.

How much LNG will Cyprus import?

Cyprus intends to import approximately 0.5 billion cubic metres (bcm) through Gas Sale Purchase Agreements (GSPAs) for three to four years, with the option to purchase LNG from SPOT markets - markets where commodities are traded for immediate delivery.

How much does Vassilikos cost?

The EU agreed in January 2018 to partially fund the cost to build infrastructure at Vassilikos for this purpose to the tune of EUR101.5 million, constituting about 40% of the eligible amount. The rest of the financing comes from the European Investment Bank and the European Bank for Reconstruction and Development.

The optimal configuration capacity of photovoltaic and energy storage depends on several factors such as time-of-use electricity price, consumer demand for electricity, cost of photovoltaic and ...

Energy storage. Energy storage. Storing energy so it can be used later, when and where it is most needed, is key for an increased renewable energy production, energy efficiency and for energy security. To achieve EU's climate and energy targets, decarbonise the energy sector and tackle the energy crisis (that started in autumn 2021), our energy
