

Nise solar Laos

Why is SolarSpace launching a solar project in Laos?

The company said it has an experienced production and management team in Laos, and those people will play a leading role in the development of the nation's clean energy industry. Laos is a new manufacturing location for SolarSpace, which has traditionally been more active in solar projects in the country.

Why should Laos invest in a floating solar plant?

"It's also a privilege to support Laos in the development of what is projected to be one of the world's largest floating PV plants." The solar plant will cover an area of 3.2km², which corresponds to less than 1% of the reservoir's area at full supply level.

How much renewable electricity will Laos generate by 2035?

The Energy Market Authority has already attracted proposals for 1.2 GW of renewable electricity, to be generated in four southeast Asian nations, and wants to raise that figure to 4 GW by 2035. EDF is planning to build a 240 MW floating PV project at Laos' largest hydropower dam.

How many hydroelectric projects will Laos build in 2020?

Overall, Laos plans to build nine hydroelectric projects on the main part of the Mekong River. According to the International Renewable Energy Agency, Laos had an installed PV capacity of around 22 MW at the end of 2020. This content is protected by copyright and may not be reused.

How will the Lao economic development project benefit Lao people?

The project will create up to 1,200 jobs for Lao people and contribute more than US\$2.4 billion to industrial production as production capacity gradually expands to become an important pillar in promoting the growth of imports and exports of the Lao People's Democratic Republic.

SolarSpace, a China-based PV cell and module manufacturer, announced the first phase of a 5GW high-efficiency solar cell plant in Laos, giving momentum to its overseas production capacity ...

The FPV project envisages the construction and installation of a 240 MWp floating solar plant covering an area of about 3.2 square kilometers, at the Nam Theun 2 hydropower station in Laos. The hydropower dam's solar extension will increase existing electricity generation with minimal use of space and no land intrusion.

September 24, 2023, PV cell and module manufacturer SolarSpace has announced the launch of its first phase production of 5GW high-efficiency PV cells factory in Laos. The Ceremony was grandly held in the Saysettha Development Zone, Laos.

The company's production base in Laos plans to build 9GW of battery plates and 3GW of high-efficiency solar cell panel assembly equipment, on a construction site of about 32 hectares, which is ...

September 24, 2023, PV cell and module manufacturer SolarSpace has announced the launch of its first phase production of 5GW high-efficiency PV cells factory in Laos. The Ceremony was ...

Innosea has joined the owner's engineer team as technical advisor for one of the world's largest floating solar projects, to be built in south-east Asia Laos. The Nam Theun 2 hydropower plant reservoir in Laos will host a 240MW floating solar plant covering an area of about 3.2 sq km.

The agreement marks a significant step in expanding Laos' clean energy infrastructure, with a focus on integrating wind, solar, and water storage energy solutions across three northern provinces: Oudomxay, Phongsaly, and Luang Namtha. Phase II builds on the initial phase of the project, which saw the deployment of solar energy capacity.

ASEAN member Laos has plans to increase renewable energy in its power mix, notably solar power buildout. However, it continues to rely on hydropower and coal-fired power plants to generate electricity, complicating both its way forward and decarbonisation plans.
