

Why is Nokia concerned about the invasion of Ukraine?

We are deeply concerned about the invasion in Ukraine and our hearts go out to all those affected by this conflict. Nokia believes in international collaboration and peaceful co-existence as the best way to improve living standards across the world.

How can Nokia help Ukraine?

We are supporting them with logistical and financial assistance and a crisis team is in close contact with our people to offer any additional help we can provide. Nokia will donate EUR1 million to UNICEF to help support its humanitarian work in Ukraine, which is focused on the critical needs of children and families.

Is Russia targeting Ukraine's energy system?

Ukraine's energy system has been regularly targeted by Russia since its full-scale invasion in 2022, with attacks intensifying since the spring of 2024. The targeting of energy infrastructure has had wide-ranging consequences for the provision of energy to Ukrainian households and other consumers.

How important is energy security in Ukraine?

These attacks on key infrastructure have recently increased and intensified, posing a huge threat to reliable access to power, heating and communications services across Ukraine this winter. This special report lays out 10 key energy actions to reinforce the country's energy security - essential to its security overall - at this critical juncture.

What is Ukraine's energy security & the coming winter?

This special report from the IEA, *Ukraine's Energy Security and the Coming Winter*, provides an energy action plan for Ukraine and its partners to help the country meet its energy needs through the challenging months ahead. Ukraine's energy system has been targeted since Russia launched its full-scale invasion of the country in February 2022.

How important is Ukraine's energy sector?

Ukraine's air defences provided some protection, but the scale of the attack and the resulting disruption highlighted once again the vital strategic importance of Ukraine's energy sector, as well as the ever-present risks to the country's energy supply.
