Could a 500MW solar project be built in South Norfolk?

Island Green Power is seeking public opinions on provisional plans for a nationally significant solar and storage project in South Norfolk. The renewable energy developer has launched public consultation on early-stage proposals for a 500MW solar development co-located with a battery energy storage system (BESS) that could have up to 500MW output.

Is Island Green Power planning a solar & battery energy storage project?

Island Green Power has unveiled plans for a utility-scale solar and battery energy storage project in Norfolk, England.

How much does electricity cost on Norfolk Island?

Electricity tariffs on Norfolk Island are dynamic and reflect the operation of the power system each and every half hour. Residents with a time-of-use meter pay and receive the dynamic tariffs. \$0.90 per day for daily supply charge.

Will Island Green get a DCO for Cottam solar project?

The non-statutory consultation comes after Island Green revealed plans for the development early in September, just one week after energy secretary Ed Miliband granted the developer a DCO for the 600MW Cottam Solar Project.

What is the island green power phase 1 consultation?

The aim of this Phase One consultation is for Island Green Power to introduce themselves, present early-stage proposals, and receive feedback from the community to help identify and understand any local impacts. The Phase One consultation is running between 23 October and 6 December 2024.

Where will solar panels be installed in Great Moulton?

Solar photovoltaic (PV) panels would be installed at two points within this area, approximately 6.5km apart. The smaller of the two, south of Great Moulton, will also be the location of the BESS part of the project, which Island Green says will have an output of up to 500MW.
