Bruce Shapiro (previously) has transformed the tools that create sculpture into the sculpture itself, using CNC machines to produce tables that trace beautiful patterns in thin layers of sand. Shapiro named this kinetic art project Sisyphus, an appropriate title as the metal balls that move through each table's sand seems to be forever rolling andContinue reading ...

22.5L Ultra-Large Storage Space: With three removable, collapsible storage bins, this toddler sensory play table holds everything from sand, water, beans, rice, play dough, leaves or whatever sensory fun you can imagine. Excellent as both a sensory table and storage table.

Based on ongoing projects just 40 MW of tidal and 26 MW of wave energy (total 66 MW of ocean energy) are expected to be deployed within the European Union by 2018, while the target is to reach an installed capacity of 100 GW ocean energy (wave and tidal) in Europe by 2050 (Magagna and Uihlein, 2015, de Andres et al., 2017a, de Andres et al ...

Ocean energy storage systems use the natural properties of the ocean for energy storage. They are not-so-distant cousins to pumped hydro (PHS) and compressed air energy storage (CAES) systems on land. There are two main types of ocean energy storage: underwater compressed air energy storage (UCAES) and underwater pumped hydro storage (UPHS).
