

Palau waxman energy

Who are Waxman energy?

Sought after in a variety of markets including technical textiles and industrial end uses, they are the first choice for all round premium quality and safety. Award-winning experts in renewable energy solutions, Waxman Energy Ltd. is one of the UK's largest distributors of PV modules, inverters, mounting systems and EV chargers.

Why did PPUC buy a solar power plant in Palau?

In March 2024, PPUC acquired energy from Palau's first commercial Independent Power Producer (IPP), a solar company. This allowed them to replace two diesel generators with solar power. While a positive step towards renewable energy goals, the IPP system currently lacks battery storage, limiting its ability to maximise excess energy.

Does Palau have a good power system?

The calibration model representing Palau's current power system also confirms this dominance of fossil fuels and the low share taken by renewable energy.

Why should you choose Waxman energy?

At Waxman Energy, we believe in leading by example and take advantage of the same renewable technologies we supply. Our site is equipped with multiple Solar PV arrays which feed energy back to the grid and help to reduce our carbon footprint.

What makes Waxman unique?

This philosophy is at the heart of Waxman and has led us from the distribution of flame retardant fibres, ceramic tiles and renewable energy technologies including battery storage and EV chargers.

Who is Waxman solar?

Specialist in the field of solar mounting systems. We source the highest quality products from some of the world's leading brands. Part of the Waxman Group, which has over 75 years of experience in distribution. We are all about putting people first, and have a reputation for excellent customer service.

The government of Palau has proposed a target of achieving 100% of its electricity generation from renewable energy sources by 2050. This renewable energy roadmap for the Republic of Palau has subsequently been ...

The Palau Public Utilities Corporation (PPUC) is undergoing a significant transformation driven by new energy technologies. This shift, centred on merging solar energy with existing diesel-generated power, presents both ...
