

At AGR we specialise in innovative development and delivery of large-scale renewable energy and sustainable agricultural projects that provide essential clean, sustainable energy and food security for communities, institutions, and blue-chip industries.

The RRA for Paraguay has identified 15 short and medium-term actions that could create more conducive conditions for renewable energy deployment in the country. These recommendations are grouped in six ...

Access to Renewable Energy: Paraguay's leadership in renewable energy ensures a reliable and cost-effective power supply for industrial activities. These support measures collectively create a favorable Paraguayan investment climate.

AGR Renewables Ltd, being a specialist in supplying sustainable and renewable solutions developed the 20 Ha sustainable greenhouse complex powered through a combination of industrial heat pumps and CHP (Combined ...

Paraguay established renewable energy targets in its National Development Plan 2014-2030. The country's goal is to reach 60% of renewable energy in total energy consumption by 2030. By the same year, Paraguay aims to reduce by 20% the share of fossil fuel

IRENA's Renewables Readiness Assessment: Paraguay, developed in close co-operation with the Ministry of Public Works and Communications in Paraguay, offers policy and regulatory recommendations that support the achievement of Paraguay's energy targets under Nationally Determined Contributions (NDC).

The RRA for Paraguay has identified 15 short and medium-term actions that could create more conducive conditions for renewable energy deployment in the country. These recommendations are grouped in six thematic areas: Strengthen institutional structure and governance in energy; Enhance planning, policy and the regulatory framework for renewable ...

AGR Renewables Ltd, being a specialist in supplying sustainable and renewable solutions developed the 20 Ha sustainable greenhouse complex powered through a combination of industrial heat pumps and CHP (Combined Heat & Power) gas engines. The project was initiated in 2021 as a standalone greenfield development and finished in 2022.

The company designs develops and manages renewable energy and large-scale agriculture projects for institutional funds, including project development, EPC delivery and operations, and asset management through which they serve their clients, enabling stakeholders with clean and low-carbon energy projects that meet partners' needs.
