Can solar energy replace fossil fuels on Pitcairn Island?

Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy. The goal is to replace 95% of the current diesel consumption on Pitcairn Island (75,000 liters per year) with a combination of energy saving and solar electricity through the installation of a hybrid photovoltaic solar energy system.

Are the Pitcairn Islands Green?

Pitcairn Islands, a group of five islands with a total area of 47 km<sup>2</sup> and which constitute one of the most remote archipelagos in the world, turn to safer, greener energies that best meet the needs of the population. Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy.

Who owns photon energy?

Amsterdam/Sydney - 20 May 2024 - Photon Energy N.V. (WSE&PSE: PEN,FSX: A1T9KW) ('Photon Energy Group', the 'Company' or the 'Issuer') has announced that it has signed an EPC and O&M contract for a 20.8 MWp solar project in New Zealand which is owned by Aquila Clean Energy APAC and Far North Solar Farm (FNSF).

Who is photon energy & LERTA?

Photon Energy was also selected to provide ongoing O&M services for the project. Photon Energy Group is a group of companies providing renewable energy, clean water and environmental remediation solutions worldwide. Photon Energy and Lerta provide comprehensive renewable energy solutions, including solar power and energy flexibility.

Who is photon energy Australia?

Georg is an Austrian national and holds a Masters in Finance from the London Business School. Michael developed one of the first large photovoltaic installations in the Czech Republic before co-founding Photon Energy in 2008. Michael was CEO of Photon Energy until relocating to Australia to start Photon Energy Australia in 2011.

What is the photon energy project?

The project represents Photon Energy's first utility-scale project in New Zealand and will be one of the first utility-scale projects to be developed by Aquila Clean Energy and FSNF in the country. Photon Energy was also selected to provide ongoing O&M services for the project.

The Company delivered a hybrid renewable energy project on Lord Howe Island, a UNESCO World Heritage Site, located in the Tasman Sea. The 1.3 MWp power plant, connected to a 3.7 MWh Tesla Powerpack battery energy storage system, has reduced the island's diesel consumption by 67%. Key highlights from the
