

PORT OF SPAIN, July 13, 2023 - Woodside Energy Group is returning the deepwater TTDA 5 exploration block in Trinidad and Tobago to the government, Reuters reported on Wednesday. The Australian energy company cited the high cost of development as one of the reasons for giving up the block.

The project, which was revealed by Grenergy in November 2023, will pair 1GW of solar PV with 4.1GWh of energy storage, which the company said makes it the largest energy storage projects in the world. "The agreement with a leading company like BYD demonstrates our firm commitment to energy storage and represents a major step forward in securing the supply ...

Maritime transport is responsible for 13% of the Greenhouse Gases (GHG) emissions of the transport sector. Port authorities, terminals, shipping companies, and other stakeholders have joined efforts to improve this sector's environmental performance. In Spain, the Ministry for Ecological Transition and Demographic Challenge has developed a methodology ...

Cepsa, the leading company in Andalusia by sales volume, will invest more than 3 billion euros to establish the Andalusian Green Hydrogen Valley, creating the largest green hydrogen hub in Europe in southern Spain. The project, part of Cepsa's 2030 strategy Positive Motion, will contribute to Europe's energy security and independence, in line ...

The Port of Rotterdam is currently exploring the possibilities for the import of green hydrogen with over 150 projects worldwide. There already are agreements with 25 countries all over the world. Varying from Norway, Spain and Scotland to the United ...

Spain has increased its energy storage target by 2030 to 22.5GW in the latest update of its National Energy and Climate Plan (NECP). The Spanish government, through the Ministry of Ecological Transition (MITECO), has passed a royal decree that updates the country's NECP targets between 2023-2030.

EUR 51.8 million investment . This ambitious project requires, by the port authority, an investment of EUR 51.8 million (\$57.7 million). For its financing, a subsidy of 4.3 million euros has been obtained for the OPS of the A5 wharf through the Recovery and Resilience Mechanism and, in parallel, the necessary procedures have been carried out to request ...

Energy-Storage.news provided a detailed look at where winning projects were located within Spain in our coverage of the auction results. Some 186MWh of the energy storage projects awarded funding are located in the Canary Islands. Iberdrola didn't reveal which company would provide the lithium-ion BESS units for the six projects.

Port of Spain energy storage record project

In 2024, the molten salt thermal storage system Sun2Store was the largest energy storage project in Spain, with 100 megawatts of capacity. The energy storage projects located at the power plants ...

The Spanish government on Tuesday approved the energy storage strategy, targeting some 20 GW of storage capacity in 2030 and reaching 30 GW by 2050 from to. Renewable. News. By source. WIND OFFSHORE; WIND ONSHORE; ... EIB extends EUR-300m loan for pumped-storage hydro project in Spain Oct 29, 2024 13:55 CEST. Spain, Lithuania ...

Q CELLS, a renowned total energy solutions provider in solar cell and module, energy storage, downstream project business and energy retail, has secured the project development rights for a 429 MWp solar portfolio in Spain from RIC Energy, further boosting Q CELLS' downstream solar pipeline in the country.

(Spain is the EU country with the most EU R& D facilities for these technologies), it will support pilot projects and pay for the logistics adaptation of port infrastructures. For electrical infrastructures, promotion of smart grids and deployment of flexibility and storage, PERTE establishes 620 million of support, with the mobilization of ...

3 ???· The Spanish ministry for the ecological transition on Friday opened two funding programmes, providing a combined total of EUR 280 million (USD 310.4m) in state aid to advance energy storage projects. The first programme is set to allocate EUR 180 million -- EUR 150 million to support standalone energy storage projects, with thermal storage ...

Spain's government has approved an energy storage strategy that it says will put the country "at the forefront" of what is being done in Europe and help it move towards its 2050 climate neutrality target. The roadmap foresees the country ramping up its storage capacity from the current 8.3GW level to 20GW by 2030 and then 30GW by 2050.

The LIVING PORTS is a European Commission Horizon 2020 funded project to facilitate a large-scale implementation at the Port of Vigo, Galicia, Spain. In alignment with the EU Green Deal, Marine Directive, and Biodiversity Strategy for 2030, de-risking and scaling of environmentally-sensitive industrialization projects is an urgent priority.

providers, and customers so they can make more informed choices. Energy storage project valuation methodology is over sector projects through evaluating various revenue and cost typical of p assumptions in a project economic model. The difference is ...
