Local companies have been able to settle in the U.S. market, which has a high barrier to entry, thanks to Korean companies building semiconductor, electric vehicle, and battery production bases one after another. Two-thirds of the power equipment at Samsung Electronics' Taylor plant in Texas is said to have been won by LS Electric.

Industry experts predict that the power infrastructure boom, driven by the large-scale market in the U.S. needing equipment upgrades, will continue until 2030. Korean companies like Doosan Enerbility (gas turbines) and HD Hyundai Electric (power transformers) are strengthening their presence in the global market with their technological ...

This latest contract award from KEPCO, in excess of USD \$100 million, is the first project by GE and the KAPES consortium in South Korea using the newest Voltage-Sourced Converter (VSC) HVDC technology, and GE's fifth VSC project in the world

**FAR EAST: SOUTH KOREA REPORT.** The consolidated financial results for the April-June period of the three major Korean battery companies show significant sales growth. LG Energy Solution's sales grew 73% y/y and operating profit was 2.4x y/y. SK On's sales grew 2.9x y/y due to the expansion of EV production. Samsung SDI's sales grew 23% y/y.

South Korea aims to have 30 nuclear plants by 2038 and to more than triple its solar and wind power output to 72 GW by 2030. The government also plans to replace ageing coal power plants with more sustainable options like pumped storage hydroelectricity and hydrogen power plants.
