Powerbox systems have emerged as a revolutionary solution that optimizes energy usage while reducing costs and environmental impact. This article delves into how powerbox systems function, their benefits, and why they are becoming an integral part of modern energy management strategies.

Powerbox delivers a complete range of marine power supplies which are type approved for use in all spaces in ships and offshore installations. This means that the user no longer needs different types for different applications, but can cover all needs with those standard power supplies.

The PowerBox Evolution is always the first choice when a small, robust battery backer system is required: the typical range of applications extends from warbirds to 3D aerobatic models and even to jets. The first series of the Evolution was introduced back in the year 2004, and since that time it has been continuously developed and improved.
