What is a solar inverter?

The solar inverter or inverter converts direct current into alternating current, thanks to which the energy from the photovoltaic system can only be used. We offer classic or hybrid (mains and battery) inverters with different performance and characteristics.

Where are solar inverters located?

Microinverters are located on the roof near the solar panels, due to which these inverters are more efficient than string inverters when it comes to converting energy. Solar systems with microinverters can still generate electricity, even if one or two panels do not perform properly.

What is a 5KTL solar inverter?

High efficiency solar inverter topology, max efficiency 98.6%. The residential single-phase inverter is protected against arc flash with AI support. Plug and Play battery connection ready, no additional equipment or retrofitting required. 5KTL solar inverter allows 5 kW full AC output plus 5 kW full battery charge.

Which inverter is best for a solar system?

String inverters are the most economical among other options and are a proven inverter technology. These inverters are also the easiest to maintain as they are easy to access. If a solar system uses a string inverter, it will produce limited electricity.
