Kuwait: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Proterra battery technology is already powering commercial vehicles and equipment from world-class manufacturers, helping operators reduce emissions while lowering operating costs. Designed in Silicon Valley and assembled in Greer, South Carolina, by the best minds in battery engineering, Proterra battery systems are safe, reliable, and efficient.
