

Who is Refex renewables?

Refex Renewables is renowned for our groundbreaking methods in solar power systems, such as the canal top solar venture, making us stand out among the competition. Explore our featured projects and discover how Refex is leading the way in sustainable innovation and excellence. Ongoing Project.

Why is Refex building a canal top solar project?

Refex has built the first canal top solar project on the Narmada River in Gujarat. This innovative project demonstrates a commitment to clean energy and water conservation through the use of photovoltaic panels on the canal system. It will lead the way for more similar projects and aid India's transition to a sustainable future.

Will Refex group Lead India's transition to a sustainable future?

It will lead the way for more similar projects and aid India's transition to a sustainable future. Refex Group currently has 113 MW \*\*\*\*\*worth of IIP projects in the C&I segment. Refex Group boasts a prominent portfolio in the C&I segment with 113 MW worth of IIP projects, including rooftop and ground-mounted installations.

What is the difference between Svalbard and Jan Mayen?

Svalbard is an archipelago in the Arctic Ocean under the sovereignty of Norway, but is subject to the special status granted by the Svalbard Treaty. Jan Mayen is a remote island in the Arctic Ocean; it has no permanent population and is administered by the County Governor of Nordland.

Who is Refex?

Refex - Your trusted partner in Renewable Energy, Ash & Coal Handling, Medical Imaging, Pharmaceuticals, Refrigerant gas, Power Trading, Venture Capital, Electric Vehicles, and Airports Retail. Your trusted partner in renewable energy.

Are Longyearbyen and Svalbard facing an energy transition?

Top image: Longyearbyen and Svalbard are facing an energy transition. This is the background for the cooperation agreement between UNIS, Store Norske and SINTEF. Photo: Graham Gilbert/UNIS. Longyearbyen and Svalbard are facing a huge energy transition.

The area potentially concerned stretches from Svalbard to Jan Mayen Island, covering 280 000 square kilometers of Arctic seabed. Despite protests and warnings from environmental organizations, scientists and many politicians, Norway has decided to go ahead with the project. Or rather, as Frode Pley, Director of Greenpeace Norway, said to CNN ...

Both Svalbard and Jan Mayen consist almost entirely of Arctic wilderness, such as at Bellsund in Svalbard..

Svalbard is an archipelago in the Arctic about midway between mainland Norway and the North Pole. The group of islands range ...

Refex Renewables envisions a future, where renewable energy is an affordable solution to sustainable living and creating an affordable uninterrupted supply of alternative energy is our contribution to a greener planet. | We have built solar ...

Svalbard and Jan Mayen, with their unique geographical and environmental characteristics, offer promising opportunities for emerging industries and investment prospects. [...]

The goal is to make Svalbard a showcase for renewable energy solutions in the Arctic. 15 March 2022 Press release from UNIS, Store Norske and SINTEF. The background for the collaboration is the future energy transition in Svalbard and in Longyearbyen, which can be briefly described as "from coal to zero" (CO2 emissions).

Both Svalbard and Jan Mayen consist almost entirely of Arctic wilderness, such as at Bellsund in Svalbard.. Svalbard is an archipelago in the Arctic about midway between mainland Norway and the North Pole. The group of islands range from 74° to 81° north latitude, and from 10° to 35° east longitude. [1] [2] The area is 61,022 square kilometres (23,561 sq mi) and there were 2,595 ...
