

Does Iraq have a solar power plant?

The contracts also cover a water intake project for injection into oil reservoirs. The solar power plant will be Iraq's first utility-scale solar power project. While the country has several other solar plans in the pipeline, the TotalEnergies project is the first to proceed to the implementation phase.

What is Iraq's solar project?

The project aims to improve Iraq's electricity supply and increase regional oil production while also recovering flared gas and building a seawater treatment plant. The Saudi company ACWA Power has been invited to join the solar project.

Will totalenergies build a solar power plant in Iraq?

French energy major TotalEnergies will build a 1-gigawatt solar power plant in Iraq as part of a cluster of contracts it was awarded in 2021 for an integrated project that entails a total investment of \$27 billion over 30 years.

Where will a 1 GW solar plant be built in Iraq?

The gigawatt-scale solar plant will be built in the Artawi oil field in Basra Governorate. In April, the French power major said it intends to invite Saudi company ACWA Power Co (TADAWUL:2082) to join the development of a 1-GW solar project in Iraq without disclosing more details.

How much solar capacity will Iraq have by 2030?

Iraq's solar plans announced in November 2021 call for the addition of 12 gigawatts of solar capacity by 2030. Some 7.5 gigawatts of the planned solar capacity are to come from utility-scale solar plants, and Iraq has reached agreements with developers - at varying stages - for projects that will add 4.5 gigawatts of the total.

How much solar power does Iraq have in 2023?

According to the latest statistics by the International Renewable Energy Agency, it had just 1,599 megawatts of renewable energy capacity at the end of 2023. Iraq has abundant untapped solar resources that could allow it to achieve its target and reduce reliance on imports of electricity.
