

What makes IREX a good solar company?

Until now, IREX becomes one of the leading Vietnamese companies to provide integrated solar power solutions to both domestic and foreign markets. Besides, IREX owns the factory with a capacity of 350 MWp and a 100% automated production line; an international-standard laboratory and experienced staff serve in researching new technologies.

Is solar energy on the verge of a major expansion in Russia?

Vadim Braidov /TASS Solar energy in Russia might be on the verge of a major expansion, thanks to a government support program for renewable energy sources, industry experts told The Moscow Times. Russia, the world's fourth-largest emitter of greenhouse gases, has historically relied on its vast oil and gas reserves to bolster its economy.

Who is the parent company of IREX Energy Corporation?

2006: The SolarBK Solar Energy Investment and Development Co., Ltd.- The parent company of IREX Energy Corporation was officially established to release the laboratory products into the market. IREX offers various solutions according to each particular customer as well as their different demands and purposes.

Does Russia have enough solar energy?

There is no sun there! Well, our data tells us differently." Moscow-based renewables company Unigreen Energy, which has received a government guarantee that it will be paid extra for the power it adds to local grids, said Russia has more than enough insolation-- solar radiation hitting an object -- to produce solar energy.

Will Russia's energy policy change?

The Omsk, Altai and Zabaikalsky regions, the republic of Sakha and other locations in Siberia and Russia's Far East launched their first solar plants in recent years, according to Tatiana Lanshina, the director of think tank Target Number Seven Association. However, she added that so far there are no signs of major changes in state energy policy.

Is Russia moving from fossil fuels to renewables?

As the third-largest carbon emitter in human history, Russia faces an uphill battle in its attempts to move from fossil fuels to renewable and other sources of clean energy. The global economy gets roughly 10% of its power from wind and solar sources, while in Russia, solar's share is just 0.2%.

Abstract: This paper explores the critical question of the sustainability of Russian solar energy initiatives in the absence of governmental financial support. The study aims to determine if Russian energy companies can maintain operations in the solar energy sector without relying on direct state subsidies.

Until now, IREX becomes one of the leading Vietnamese companies to provide integrated solar power

solutions to both domestic and foreign markets. Besides, IREX owns the factory with a capacity of 350 MWp and a 100% automated production line; an international-standard laboratory and experienced staff serve in researching new technologies.

Today IREX is becoming one of the leading Vietnamese companies providing integrated solutions for solar energy in both domestic and foreign markets. In addition, IREX owns a 350 MW plant and a fully automated production line; an international standard laboratory and experienced staff serve to research new technologies.

ABOUT THE PROJECT: Ivanpah Solar Electric Generating System (owned by NRG Energy, Google and BrightSource Energy) uses solar tower technology to produce clean, reliable solar electricity for more than 140,000 homes. Ivanpah is the world's largest solar thermal power tower.
