Who will receive a \$7 billion solar grant?

Washington - Today, April 22, as the Biden-Harris Administration celebrates Earth Day, the U.S. Environmental Protection Agency announced 60 selectees that will receive \$7 billion in grant awards through the Solar for All grant competition to deliver residential solar projects to over 900,000 households nationwide.

What solar projects are getting grants?

Among those receiving grants are state projects to provide solar-equipped roofs for homes, college residences and residential-serving community solar projects in West Virginia, a non-profit operating Mississippi solar lease program and solar workforce training initiatives in South Carolina.

What is a solar for all grant?

New grants for Solar for All programs aim to install solar panels and boost community solar access nationwide. Here's the list of grantees near you. Community solar projects such as this one are one pillar of the new widespread Solar for All projects.

Who is eligible for state solar for all programs?

If you live in Illinois, New York or Washington, D.C., you may be eligible to apply to state Solar for All programs. New projects will be underway soon.

Who is eligible for community solar?

Community solar applications are often available for everyone, although space on the grid is set aside for low- and middle-income households. If you live somewhere where the local Solar for All program offers free solar panel system installation, your eligibility hinges upon your household income.

Is solar for all a national program?

Some states and communities have already had Solar for All programs, but the \$7 billion in grants authorized by the Inflation Reduction Act and awarded this week by the US Environmental Protection Agency will allow for a national adoption of the model. What is Solar for All?
