

What is the future of electricity in Saint Lucia?

At the same time, recent developments in energy efficiency, renewable energy, cleaner-burning fuels (e.g., natural gas), electricity storage, and advanced controls and metering present a myriad of opportunities. Saint Lucia's current electricity system is well managed, reliable, and equitable.

What is the energy potential of Saint Lucia?

Saint Lucia is a volcanic windward island, with large technical potential for geothermal, wind, and solar renewable energy generation, as well as use of solid waste generated by residents. Little technical potential for biomass or hydroelectric generation exists on the island.

How much does electricity cost in Saint Lucia?

The 2015 electricity rates in Saint Lucia are \$0.34 per kilowatt-hour (kWh), in line with the Caribbean regional average of \$0.33/kWh. Like many island nations, Saint Lucia is almost 100% reliant on imported fossil fuels for electricity generation, leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity.

What is Saint Lucia's energy transition opportunity?

RESULTS Saint Lucia's energy transition opportunity provides a win-win situation in which the Government of Saint Lucia supports constituents through cheaper electricity, and LUCELEC continues to profit and provide reliable service.

Is Saint Lucia reliant on fossil fuels for electricity generation?

Like many island nations, Saint Lucia is almost 100% reliant on imported fossil fuels for electricity generation, leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity.

Electricity Sector Data

Is Saint Lucia's Electricity System reliable?

Saint Lucia's current electricity system is well managed, reliable, and equitable. This can be primarily attributed to the fact that LUCELEC is a responsible and financially sound utility.

This document presents St. Lucia's Energy Report Card (ERC) for 2020. The ERC provides an overview of the energy sector performance in St. Lucia. The ERC also includes energy efficiency, technical assistance, workforce, training, and capacity building information, subject to the availability of data.

The National Energy Policy outlines the best energy practices for St. Lucia as the country attempts to become more energy secure. This energy security goal was outlined to include renewable energy from indigenous sources and diversify sources of petroleum. 2017 Saint Lucia National Energy Transition Strategy and Integrated Resource Plan [29]

Energy Snapshot Saint Lucia This profile provides a snapshot of the energy landscape of Saint Lucia, one of six Caribbean countries that make up the Windward Islands--the southern arc of the Lesser Antilles chain--at the eastern end of the Caribbean Sea. The 2015 electricity rates in Saint Lucia are \$0.34 per kilowatt-hour (kWh), in line with the

saint lucia aims to ensure a secure, reliable, greener, and more resilient energy scetor. The updated National Energy Policy for the period 2023-30 and its accompanying implementation plan represent a significant milestone in Saint Lucia's journey toward a more sustainable, resilient, and prosperous future.

This document presents St. Lucia's Energy Report Card (ERC) for 2021. The ERC provides an overview of the energy sector performance in St. Lucia. The ERC also . includes energy efficiency, technical assistance, workforce, training and capacity building . information, subject to the availability of data.

Saint Lucia: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

92 per cent of Saint Lucia's primary energy comes from petroleum products. This dependency persists despite the island nation's considerable renewable resources - including enough solar potential to replace 41 per cent of its current fossil fuel electricity generation capacity and an estimated 680 MW of untapped geothermal power.

Saint Lucia's energy transition opportunity provides a win-win situation in which the Government of Saint Lucia supports constituents through cheaper electricity, and LUCELEC continues to profit and provide reliable service. The analytical team supporting the IRP initially examined 14 scenarios for the future energy mix of Saint Lucia,

Overview of the National Energy Policy (NEP) The NEP for Saint Lucia, covering the period 2023 to 2030, reflects the commitment of the Government of Saint Lucia to strengthen energy security and reduce energy supply costs. Furthermore, the NEP will help the country meet its nationally determined commitment
