

Apia, Samoa - 18 November 2024 - A recent study has shed light on the promising demand for rooftop solar energy in households and businesses across Samoa. The study was conducted by the Market Development Facility (MDF), funded by the Australian Department of Foreign Affairs (DFAT) and co-funded by the New Zealand Ministry of Foreign [...]

In an effort to achieve the renewable energy targets for Samoa, EPC seeks to implement two additional Solar & BESS Renewable Energy Generation Facilities (REGF"s). To this end, EPC ...

In an effort to achieve the renewable energy targets for Samoa, EPC seeks to implement two additional Solar & BESS Renewable Energy Generation Facilities (REGF"s). To this end, EPC is now soliciting EOI"s from suitably qualified Independent Power Producers

The project contributes to PIGGAREP Greenhouse Gas Abatement goals of CO2 emissions reductions of at least 30% by 2015 as compared to their Business as Usual scenario, and to the Government of Samoa"s goals of increasing renewable energy"s share of total energy production to 20% by 2030.

4 ???· The project is expected to represent a capacity of up to 40 megawatts of solar and 40 megawatt-hours of batteries. According to the ADB, this will be a cornerstone of Samoa"s efforts to achieve 70 per cent renewable energy in its electricity mix by 2031.

4 ???· The project is expected to represent a capacity of up to 40 megawatts of solar and 40 megawatt-hours of batteries. According to the ADB, this will be a cornerstone of Samoa"s efforts to achieve 70 per cent renewable energy in its ...

South Pacific Island efforts to reduce dependence on costly and polluting diesel fuel continue, with the installation of 546kW of solar PV across the islands of Samoa - the independent state"s largest solar project yet.

South Pacific Island efforts to reduce dependence on costly and polluting diesel fuel continue, with the installation of 546kW of solar PV across the islands of Samoa - the independent ...

6 ???· MANILA, PHILIPPINES (10 December 2024) -- The Asian Development Bank (ADB) has signed a transaction advisory services agreement with Samoa"s Electric Power Corporation (EPC) to support the development of a solar photovoltaic and battery energy storage systems with installations planned for the country"s two largest islands, Upolu and Savai"i.

One of the most promising renewable energy sources in Samoa is solar power. The country enjoys abundant

Samoa big solar energy

sunshine, with an average of 2,800 hours of sunlight per year. This makes solar energy a highly viable option for electricity generation.
