

What is Senegal's energy policy?

The IEA's Energy Policy Review of Senegal 2023, published today, finds that energy is at the heart of Senegal's 2035 strategy for accelerating sustainable development and economic growth known as the Plan S&#233;n&#233;gal &#201;mergent(PSE), or the Emerging Senegal Plan.

How can mobile operators support smart service delivery in Senegal?

In the case of Senegal, the strongest opportunities for mobile operators to support smart service delivery may be in offering a suite of mobile services to Senelec and its customers as well as other ESCOs.

Will Senegal become an oil and gas producer in 2024?

This partnership could mobilise up to EUR 2.5 billion to support Senegal's efforts to achieve universal energy access and strengthen a resilient, secure and sustainable energy system that fosters sustainable development and economic growth. In 2024, Senegal is expected to become an oil and gas producer.

Can Senegal achieve its broader economic objectives?

Senegal's significant efforts to develop its energy sector and deliver energy access to more people are laying important groundwork for the country to achieve its broader economic objectives, according to a new report from the International Energy Agency (IEA).

How has Senegal reformed its energy sector?

Since the launch of the Plan S&#233;n&#233;gal &#201;mergent, Senegal has adopted reforms designed to attract foreign investment in its energy sector and boost participation from the private sector, while leveraging significant support from development finance institutions.

Is Senegal a good country for energy transitions?

Senegal is a strong advocate for just energy transitions. The country has already met the wind and solar targets it established for 2025 under its most recent Nationally Determined Contribution to the Paris Agreement, and it has joined the Global Methane Pledge to reduce the world's methane emissions 30% from 2020 levels by 2030.

The Senegalese president has informed Akilee's management that the state wants to acquire a 100% stake in the Senegalese smart electricity meter startup. Since early April, this new venture has been wrangling with the national electricity supplier Senelec, which placed an ...

Smart grids use AI to dynamically manage electricity distribution, integrate renewable energy sources, and enhance grid resilience. Advanced AI algorithms can analyze data from smart meters and sensors to optimize energy distribution in real-time, respond to outages more effectively, and enable demand response strategies.

# Senegal conlux smart energy solutions

This case study, led by the GSMA Mobile for Development Utilities programme in partnership with Orange, explores the opportunity for mobile technology and mobile operators to support smart solutions for improved energy access in Senegal.
