Enel X's software optimizes projects that include the use of solar energy, fuel cells and energy storage. Regardless of whether you already have such systems up and running in your facility or are interested in integrating them with a battery storage system, customers can choose from among different Enel X storage business models that ensure all their energy needs are met.

Atomically nitrogen-coordinated iron atoms on carbon (Fe N C) catalysts are emerging as attractive materials to substitute precious-metal-based catalysts for the oxygen reduction reaction (ORR). However, Fe N C usually suffers from unsatisfactory performance due to the symmetrical charge distribution around the iron site. Elaborately regulating the ...

At the same time, the company has established and improved the management system and related procedures for product research and development, production, sales, approval, transportation, storage, use, export, distribution and agency, allowing customers to truly enjoy the significant achievements brought by technological products!
