

Slovakia moss landing energy storage facility

What is Moss Landing energy storage?

The Moss Landing Energy Storage Facility, the world's largest lithium-ion battery energy storage system, has been expanded to 750 MW/3,000 MWh. Moss Landing is in Monterey County, California, on the site of a gas-powered plant.

How big is Vistra's Moss Landing energy storage facility?

Meet the 1,200 MWh/300 MW Vistra's Moss Landing Energy Storage Facility, which easily beats the nearby Tesla installation (730 MWh/182.5 MW) and the previous largest Hornsdale Power Reserve in South Australia - 150 MW /193.5 MWh after expansion.

When will Vistra's Moss Landing battery energy storage project start?

Pending the receipt of CPUC approval, Vistra anticipates construction on the third phase of the Moss Landing battery energy storage project will commence in May 2022 and will begin commercial operations prior to June 2023. With a robust pipeline of projects, Vistra plans to grow its zero-carbon Vistra Zero portfolio to 7,300 MW by 2026.

What's new at Moss Landing?

Vistra today announced that it completed Moss Landing's Phase III 350-megawatt/1,400-megawatt-hour expansion, bringing the battery storage system's total capacity to 750 MW/3,000 MWh, the largest of its kind in the world. The Phase III project is made up of 122 individual containers that, together, house more than 110,000 battery modules.

Does Moss Landing have a natural gas plant?

Aerial view of the Moss Landing site, including the Vistra natural gas plant which the site is historically better known for. Image: LG Energy Solution. Vistra has previously said Moss Landing Energy Storage Facility could eventually host 1.5GW/6GWh of battery storage, if market conditions make that viable.

Who owns Moss Landing?

Moss Landing is in Monterey County, California, on the site of a gas-powered plant. It's owned by Vistra Energy (NYSE: VST), an Irving, Texas-based retail electricity and power generation company that owns the second-most energy storage capacity in the US.
