

Their job is to securely and efficiently mount solar panels to a roof, wall, property or other surfaces, while ensuring optimum tilt and orientation for maximum performance. These structures must be robust and weatherproof to maintain the integrity and functionality of the solar panels over many years.

In its National Energy and Climate Plan, Slovakia has set a target to achieve an estimated installed capacity of 0.5 GW of wind power, 0.8 GW of biopower, 1.75 GW of small hydropower, and 1.2 GW of solar PV power by 2030.

Slovakia's National Energy and Climate Plan sets an ambitious target of achieving a 19.2% share of renewable energies in gross final energy consumption by 2030. To ensure the security and affordability of electricity and heat generation, the state is poised to support renewable energy sources that do not incur significant additional costs for ...

Slovakia's National Energy and Climate Plan sets an ambitious target of achieving a 19.2% share of renewable energies in gross final energy consumption by 2030. To ensure the security and affordability of electricity ...

Slovak Solar s.r.o. is a leading photovoltaic wholesaler in Slovakia, Czech Republic and Austria, with a vision to create a sustainable energy future. We started our journey in 2009 with a simple idea - to give companies specialising in solar installation access to premium photovoltaic products, all from one place. Since then, we have grown ...

Slovak Solar s.r.o. is your reliable partner in the world of photovoltaics. From solar panels and inverters to top-notch technical support, we have everything you need to create a successful solar project. With us, you will be at the forefront of the solar revolution and change the future of energy. Don't wait, become a leader in ...

Thanks to our long-term experience with solar power plants, we will provide you a tailor-made solution with the best possible return on investment. Since 2022 we offer also „LSE service“, a financing option in the form of a rental, through our new subsidiary green energy roofs.

Slovak Solar s.r.o. is your reliable partner in the world of photovoltaics. From solar panels and inverters to top-notch technical support, we have everything you need to create a successful ...

Slovakia has around 472 MW of installed solar PV power generation capacity in 2019. Solar PV is expected to claim 44% of the clean energy capacity needed to generate 2.4 TWh of electricity by 2021. In particular, solar energy provides an important contribution to meet energy needs in the electricity sector.
