

SP Group is pioneering the use of smart charging (V1G) and vehicle-to-grid (V2G) as sustainable energy solutions for transportation in Singapore. We have invested in The Mobility House (TMH) to leverage expertise and technology in Europe and the United States to boost Singapore's electric mobility capabilities.

The two Singapore headquartered solution providers intend to build an end-to-end net zero carbon urban infrastructure solution for the public and commercial sectors, drawing on their combined strengths in digitalisation, artificial intelligence-based Internet of Things and smart urban solutions.

SP Group is committed to enabling a low carbon, smart energy future for customers in Singapore and the region. We develop sustainable solutions for individuals and organisations, powered by our in-house energy technology ...

SP Group is a leading utilities group in the Asia Pacific, empowering the future of energy with low-carbon, smart energy solutions for its customers. It owns and operates electricity and gas transmission and distribution businesses in Singapore and Australia, as well as sustainable energy solutions in Singapore, China, Thailand and Vietnam.

SP Group is not alone in having to overcome barriers related to reliability. However, the company aims to empower a sustainable energy future for everyone through reliable power and a smart grid. Khoo believes that new technologies will continue to explore "smartness", which will lead to further grid optimisation.

The CNE group is a smart energy solutions provider. We are a comprehensive energy solutions provider headquartered in Singapore, focusing on delivering core products in photovoltaics, energy storage, and power distribution systems.

Smart Energy Pte Ltd (SEPL) is a home-grown provider of clean energy in Singapore, powering both local motorists and industries with compressed natural gas (CNG) and high quality diesel (Euro-5). Established in 2006, Smart Energy began its journey by pioneering the first two CNG refuelling stations in Mandai and Serangoon areas to meet the ...

At SP Group, our mission is to empower the future of energy for our customers in Singapore and across the Asia Pacific, through reliable, low-carbon, smart energy solutions. We act as a bridge to bring proven solutions that assist Singapore on its green journey to the region to contribute towards the region's desire to decarbonize and achieve ...

How is NG used in Singapore? Singapore has no natural resources and as such has to import all its energy requirements; NG is being imported from Indonesia and Malaysia by licensed importers approved by the Energy Market Authority (EMA). The primary use of NG in Singapore is for power generation and other industrial purposes.
