

MODULA Vertical lift systems are known to cut down the warehouse floor space by 90%, improve efficiency of production and the storage facility in general, advancing the throughput of picking and extraction, in the same time mitigating personnel and product risks.

Syria Smart can install and maintain all data center equipment to suit the requirements of companies by: Configure, maintaining and developing servers. Configure, maintaining and developing switches and routers. Configure, maintain, and upgrade external storage (NAS Storage, San Storage).

MOTOMA takes great pride in showcasing a remarkable demonstration of our unwavering dedication to efficient, dependable, and sustainable Energy Storage Solutions - the successful enhancement of a solar energy storage facility for a global corporation in Syria. This project stands as a testament to Motoma's exceptional performance, enduring ...

The MOTOMA Energy Storage System, containing solar panels, inverters, and LiFePO4 lithium batteries, is designed to seamlessly power daily-use appliances and equipment such as air conditioners, refrigerators, lights, fans, and TVs. Not only does it cater to current energy needs, but it also provides the flexibility for future upgrades.
