

An extensive range of Rolec EV charging points designed to deliver fast and reliable charging, ensuring your electric vehicle is always ready to hit the road. Solutions for residential and commercial settings, read more below to find out which charger is best suited for your needs.

AIMS Power's modified sine inverters and pure sine inverters can handle any job in Malta, and these products will do it without producing any polluting emissions. We carry and ship inverter chargers, MPPT solar charge controllers, battery chargers (AC to DC converters), cables, fuses, deep cycle batteries and more ...

Inverters play a crucial role in your solar system by converting the DC electricity generated by the panels into AC electricity, which can be used by your home or business. We pair our solar panels with leading inverter technologies to ensure maximum efficiency and performance.

Primarily known for its smartphones, Huawei's solar division is now producing solar inverters that are set to lead the industry over the next few years. Its excellent SUN2000 inverter is offered in both single-phase and three-phase guises, ensuring that it can be used for both residential and commercial applications.

With 12V up to 48V models available, the Phoenix Smart inverter is powerful and versatile. Bluetooth communication is standard with the smart models, allowing you to set up the inverter and monitor it seamlessly. All inverters are true sine wave and offer a high start up current to power your demanding loads.
Data Sheet

Product Introduction The Bluesun Hybrid Solar Inverter 6kW is a versatile and compact multi-functional solution, seamlessly integrating an inverter, solar charger, and battery charger into one powerful unit. Designed to provide uninterrupted power supply, this inverter maximizes the efficiency and output of your solar system. Ideal for residential and light commercial ...

For an on-grid PV system with batteries using a hybrid inverter, we are also able to offer the option to install a Back-Up System. This system automatically detects an Enemalta power cut and switches over to back-up mode.

Yes, the basic setup includes a battery backup of up to 9.6 kWh. The battery offers two modes - Eco Mode and Backup Mode. In Eco Mode, it prioritises using solar energy for immediate needs and stores excess energy, while in Backup Mode, it conserves stored energy for potential outages, limiting regular consumption from the battery.
