

# Solar energy generator for home Indonesia

A solar generator is a portable generator that usually works along with solar panels. It typically acts as an automatic backup battery to power your home and your household appliances and/or electronic devices when you run out of electricity due to power outages.

SMSolar (PT Surya Mitra Sentral) is a solar power developer based in Bogor, Indonesia. We aim to provide affordable, efficient, sustainable, and long-term solar energy solutions for residential, commercial, and industrial.

Choose Solar Power Indonesia for expertly designed and engineered renewable energy power systems that deliver long-term reliability, sustainability, and value. Our technical specialists take a collaborative approach to understand your unique energy requirements, providing tailored solutions that meet your specific needs.

Homaya range powers both AC and DC loads from the smart synergy of solar and grid energy. Gain energy independence, access to electricity or reduce diesel generator costs by leveraging Homaya off-grid solutions for homes & productive loads.

Ideal for tiny homes, cabins, or remote outposts, these systems support small energy requirements and are perfect for those seeking a simple, self-sufficient lifestyle. Design Load: <20kWh per day; Inverter-Charger (PCS) capacity: 5kW single phase; PV Solar Capacity: 3-5kWp; Battery Energy Storage Capacity: 5kWh

Our smart off-grid solar systems consist of 3 main components: solar panels, lithium battery(s), and hybrid inverter(s). Solar panels only produce energy when there is direct sunlight. In Indonesia, this translates to roughly 4.2 kWh of ...

Our smart off-grid solar systems consist of 3 main components: solar panels, lithium battery(s), and hybrid inverter(s). Solar panels only produce energy when there is direct sunlight. In Indonesia, this translates to roughly 4.2 kWh of energy per kW installed.
